SUMMARY

Entry-level Data Analyst and Business Intelligence candidate transitioning from IT into analytics. Bridges the gap between raw data, technical constraints, and executive strategy. Leverages a foundational background in software engineering to troubleshoot complex data models, clean data anomalies, and coordinate stakeholder testing. Equipped to support junior analyst work: capable of eliciting business requirements, translating them into structured process flows, maintaining reports, and explaining actionable insights to non-technical users.

EDUCATION

Pamantasan ng Lungsod ng Pasig

Bachelor of Science in Information Technology *(Expected Graduation: April 2027)*

EXPERIENCE

1816 Car Rental Co. — Business Analysis Capstone | *Jun 2026 - Oct 2026*

- Elicited functional requirements through client interviews and integrated research-adviser recommendations directly into formal system documentation.
- Authored project data privacy protocols and coordinated stakeholder User Acceptance Testing (UAT) with 21 participants.
- Developed backend reporting modules, generating a 150-booking demonstration dataset and revenue CSV exports.

SQL Data Cleaning & Exploratory Data Analysis (Layoffs Dataset) | *Oct 2026*

- Cleaned a messy global layoffs dataset using MySQL to prepare raw data for accurate analysis and reporting.
- Removed duplicate records using Common Table Expressions (CTEs) and ROW_NUMBER(), and standardized text and date formats.
- Executed advanced self-joins to impute missing industry data and calculated rolling totals using window functions.

Power BI Superstore Data Modeling | *Sep 2026*

- Diagnosed and resolved a critical Many-to-Many cardinality model failure that prevented dashboard visuals from rendering properly.
- Traced the root cause to 700 phantom null rows using Power Query, filtered out anomalies, and reformatted the primary key to establish a clean 1-to-Many relationship.

Systems Analysis & Database Architecture (CourseDock / RevOn ERP) | *2025 - 2026*

- Gathered user requirements for academic monitoring and fleet reservation systems.
- Designed relational MySQL database schemas and mapped As-Is/To-Be business process flows to handle billing, reporting, and curriculum tracking.

KEY ACHIEVEMENTS

- **System Evaluation Success:** Secured a 3.72/4.00 Grand Overall Weighted Mean (Strongly Agree) from 21 stakeholders for the 1816 Car Rental capstone system.
- **1st Place, Best Presenter:** Research Congress (2023).
- **Academic Excellence:** Consistent Dean's Lister and President's Lister.
- **Certifications:** DataCamp "Introduction to SQL" (October 16, 2026).

SKILLS

Business Analysis: Requirements Elicitation, User Stories, Acceptance Criteria, BPMN / Process Mapping, UAT Coordination

Data Analytics & BI: SQL (MySQL), Exploratory Data Analysis (EDA), Power BI, Power Query (ETL), Relational Data Modeling

Reporting & Tools: Microsoft Excel (Pivot Tables, Data Validation, Conditional Formatting, SUMIFS/COUNTIFS), Jira
